CERTIFICATIONS

- Python: 100 days of code (Udemy)**
<https://www.udemy.com/certificate/U-C-44cf7070-1712-451a-a861-dfc6eb8e9d9e/>
- Generative AI: Google Cloud Skill Boost**
https://www.skills.google/public_profile/s/7e327ec4-e477-4896-976e-8414f0f5e7d8/badges/16366110?utm_medium=social&utm_source=linkedin&utm_campaign=ql-social-share
- Web Development: Verzeo**
<https://drive.google.com/drive/folders/1Q4vVVMnf8pkQAMLkufG-GcPbN1pSup9i>

TECH SKILLS

- Languages:** Python, Java, Javascript
- Databases:** SQL, MySQL, PostgreSQL, MongoDB (Mongoose DB)
- ORM / Backend Tools/ Baas:** SQLAlchemy, Supabase, Convex, REST APIs, Flask, Firebase
- Frontend frameworks:** Threejs UI, React, Angular, React-native

LANGUAGES

- English
- Hindi
- Odia

ABOUT ME

AI-literate Software Developer obsessed with building real products. Strong in core CS fundamentals, APIs, automation, and scalable architecture. Currently sharpening system design while shipping AI-driven enterprise-grade projects. Ready to work | Ready to build.

EXPERIENCE

- Software Developer - E -Mech Solutions** MAY-2025- ONGOING
 - Designed and incorporated MongoDB data models and queries for efficient data storage and retrieval.
 - Integrated third-party services including Razorpay (payments) and Cloudinary (media storage).
 - Actively performed API testing and unit testing using Postman to ensure reliability, correctness, and performance.
 - Collaborated in an agile startup environment, contributing across the full product lifecycle from development to deployment.
- Senior Engineer - Larsen and Toubro** JUNE-2024- FEB-2025
 - Optimised enterprise logistics transaction system (Order → Dispatch) integrated with Infor LN using 3GL/4GL, SQL.
 - Developed a .NET-based automated ticketing platform with cloud tracking for RCA and test reports.
 - Generated ERP reports using SSRS across Dev/QA/Prod environments for high-volume data for faster decisions.
 - Automated routine admin workflows using Python Selenium, cutting manual effort, errors and fatigue by 50 %
- Graduate Engineer Trainee- Larsen and Toubro** JULY 2023-JUNE 2024
 - Built enterprise applications using Angular for client-side UI and .NET for server-side architecture.
 - Gained exposure to enterprise network infrastructure and Zero-Trust cybersecurity architecture, supporting defence & aerospace critical projects.
- Software Developer Trainee - Eve Healthcare** FEB 2023- MAY 2024
 - Engineered enterprise-grade Flask backend services (REST APIs, auth, DB integration) for healthcare applications.
 - Developed Flask/Django messaging apps and automated web scraping alerts for lowest hospital inventory pricing.
 - Created dashboards for hospital resources, patient history, and diagnostic images,, enabling visibility and UX

PROJECTS

- AKTGRAM (Social Media Mobile Application)** *Github:* <https://github.com/Akt99/AKTGRAM>
 - Micro-social app with a creator-centric, dark UI for fast text posting and lightweight engagement. Shipped on iOS Simulator via a custom dev client, with graceful fallbacks & improving UI consistency by 30 %.
 - Implemented Google Sign-In with Firebase Authentication and persisted user profiles (name + google profile photo)
 - 50% less network overhead with Firestore data model for posts, comments, and likes, enabling real-time feed updates.
 - Merged interactive UX patterns (FAB create flow, bottom-sheet comments, loading states), improving interaction.

Technologies Used: React-native, Firebase, Firestore, Expo, ios Simulator
- Akt Blogs (Blogging Platform)** *Github:* <https://github.com/Akt99/BlogWebsiteDep2>
 - A full-stack blogging platform using React + Flask + SQLAlchemy (with Three.js UI elements) to ensure efficient scaling.
 - Applied secure authentication (users must log in to create posts/comments), reducing risk of token leakage by 100%.
 - Enforced role-based access control with auto-assigned first user Admin. Integrated Gravatar-based user avatars using email for consistent identity without storing images, reducing overhead of profile photos by 100 % .
 - Added Admin moderation tools: pin/unpin posts, delete any post/comment, and admin status display.

Technologies Used: React, Flask, Three.js, SQLAlchemy,
- Akt Mart (E-Commerce Platform)** *Github:* <https://github.com/Akt99/AktMart>
 - A full-stack product store (MERN) enabling users to perform CRUD operations. REST-based backend design improved API clarity and maintainability, supporting 30% faster feature additions and easier debugging. Leveraged Vite's fast bundling and HMR, reducing development build times by 50% compared to traditional React setups.
 - Implemented efficient global state management with Zustand for seamless product handling.

Technologies Used: React, ChakraUi, Express, MongoDB

EDUCATION

- Bachelor of Technology** AUG 2019- MAY 2023

Information Technology | Odisha University of Technology and Research **GPA:** 9.17/10

 - Relevant Coursework:** Advanced Computer Networks, Operating Systems and Concurrency, Data Structures and Algorithms, Theory of Computation, Compiler Design and Optimization, Data Mining Techniques, Big Data Systems and Analytics
 - Interests:** Exploring emerging technologies, Performing arts (acting & dance), Team collaboration and leadership activities. Badminton enthusiast. Active powerlifting and calisthenics.
